To our campus partners:

Please be mindful of the weather over the next several days if you or your staff will be working outdoors. The temperature is predicted to be in the 80’s from Tuesday, 09/21/2021 through Thursday, 09/23/21:

Please click the following link Work Planning and Site Checklist to help prevent heat illness and document acknowledgment. Remember to implement the “high-heat” procedures noted on the checklist if temperatures equal or exceed 95 degrees. Please make sure you and your employees are aware of the heat and the procedures needed. Stay hydrated and do your best to keep cool.

The Environmental Health & Safety Office will continue to monitor for warm weather and share any accompanying heat advisories shared by the Orange County Health Care Agency.
