Empty Hazardous Chemical Container Flowchart

For a hazardous chemical container to be considered empty:

<table>
<thead>
<tr>
<th>Liquids</th>
<th>No liquid can drain from the container when tilted in any direction.</th>
</tr>
</thead>
<tbody>
<tr>
<td>Solids</td>
<td>The walls of the container must be scraped clean and cannot contain any adhered or encrusted materials. Solids include powder, sludge, grease, thick resin, crystals, etc.</td>
</tr>
<tr>
<td>Aerosols</td>
<td>Must have the contents and pressure completely dispensed, the spray mechanism in place and functional.</td>
</tr>
</tbody>
</table>

Do not dispose of hazardous waste using sinks, drains, intentional evaporation, or as regular trash.

Follow the flowchart to appropriately manage your empty containers.

Did the container hold an **acutely or extremely** hazardous material?

- Yes
- No

Is the container greater than 5 gallons?

- No
- Yes

Is the container a full or partially full aerosol spray can?

- No
- Yes

Is the container a lecture bottle or a non-refillable cylinder?

- Yes
- No

Refillable cylinders must be returned to the manufacturer.

Cross out the chemical name and any hazard warnings with a permanent marker, write the word “EMPTY” on the container and dispose of the container in the trash.

Dispose of the container as a hazardous chemical waste. Submit a Text a Pickup or Chemical Waste Collection.
