STOP THE SPREAD OF GERMS
Help prevent the spread of respiratory diseases like COVID-19

Everyone should wear non-medical face coverings when in public, such as:

- Bandanas
- Scarves
- Other cloth or fabric

1. Perform hand hygiene before handling your face covering.
2. Make sure it fits snugly but comfortably against your face.
3. Launder when soiled or dirty. Frequency of washing is dependent on frequency of use.
